

<<统计物理学>>

图书基本信息

书名：<<统计物理学>>

13位ISBN编号：9787506259378

10位ISBN编号：7506259370

出版时间：2003-6

出版时间：世界图书出版公司

作者：Leo.P.Kadanoff

页数：483

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

## <<统计物理学>>

### 内容概要

Leo Kadanoff is a theoretical physicist who has done research on chaos theory, superconductivity, phase transitions, fluid flow, the sociology of urban areas, heat transfer in missiles and elementary particle physics. During the last twenty-five years, he has devoted considerable effort to the development of teaching programs for undergraduates based upon the use of small computers. Much of this teaching program has been an outgrowth of his interest in the description of chaos in physical systems.

此书为英文版。
