

<<数值分析>>

图书基本信息

书名：<<数值分析>>

13位ISBN编号：9787506259668

10位ISBN编号：7506259664

出版时间：2003-6

出版时间：北京世图

作者：R.Kress

页数：326

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<数值分析>>

内容概要

No applied mathematician can be properly trained without some basic understanding of numerical methods, i.e., numerical analysis. And no scientist and engineer should be using a package program for numerical computations without understanding the program's purpose and its limitations. This book is an attempt to provide some of the required knowledge and understanding. It is written in a spirit that considers numerical analysis not merely as a tool for solving applied problems but also as a challenging and rewarding part of mathematics. The main goal is to provide insight into numerical analysis rather than merely to provide numerical recipes.

<<数值分析>>

书籍目录

1 Introduction 2 Linear Systems 2.1 Examples for Systems of Equations 2.2 Gaussian Elimination 2.3 LR Decomposition 2.4 QR Decomposition Problems 3 Basic Functional Analysis 3.1 Normed Spaces 3.2 Scalar Products 3.3 Bounded Linear Operators 3.4 Matrix Norms 3.5 Completeness 3.6 The Banach Fixed Point Theorem 3.7 Best Approximation Problems 4 Iterative Methods for Linear Systems 4.1 Jacobi and Gauss-Seidel Iterations 4.2 Relaxation Methods 4.3 Two-Grid Methods Problems 5 Ill-Conditioned Linear Systems 6 Iterative Methods for Nonlinear Systems 7 Matrix Eigenvalue Problems 8 Interpolation 9 Numerical Integration 10 Initial Value Problems 11 Boundary Value Problems 12 Integral Equations References Index
