书籍目录

Translator ' s Preface Preface to the French Edition Chapter Signals and Systems Lesson 1 Signals and Systems  
 1.1 General considerations 1.2 Some elementary signals 1.3 Examples of systems Lesson 2 Filters  
 and Transfer Functions 2.1 Algebraic properties of systems 2.2 Continuity of a system 2.3 The filter  
 and its transfer function 2.4 A standard analog filter: the RC cell 2.5 A first-order discrete filter Chapter  
 Periodic Signals Lesson 3 Trigonometric Signals 3.1 Trigonometric polynomials 3.2 Representation  
 in sines and cosines 3.3 Orthogonality 3.4 Exercises Lesson 4 Periodic Signals and Fourier Series  
 4.1 The space  $L^2/p(0,a)$  4.2 The idea of approximation.....Chapter The Discrete Fourier Transform  
 Transform and Numerical ComputationsChapter The Lebesgue IntegralChapter SapcesChapter Hilbert  
 SpacesChapter Along FiltersChapter DistributionsChapter Convolution and the Fourier Transform of  
 DistributionsChapter Filters and DistributionsChapter Sampling and Dcrete FiltersChapter Current  
 Trends:Time-Frequency AnalysisReferencesIndex
