

<<极值统计建模导论>>

图书基本信息

书名：<<极值统计建模导论>>

13位ISBN编号：9787506291897

10位ISBN编号：7506291894

出版时间：2008-3

出版时间：世界图书出版公司

作者：科尔斯

页数：208

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<极值统计建模导论>>

内容概要

This book is intended for both statisticians and non-statisticians alike. It is hoped, in particular, that it will appeal to practitioners of extreme value modeling with limited statistical expertise. The mathematical level is elementary, and detailed mathematical proof is usually sacrificed in favor of heuristic argument. Rather more attention is paid to statistical detail, and many examples are provided by way of illustration. All the computations were carried out using the S-PLUS statistical software program, and corresponding datasets and functions are available via the internet as explained in the Appendix.
