书籍目录

- 1 General
- 2 Quantity of Water Resources
- 3 Water Storage
- 4 Development and Utilization of Water Resources
- 5 Water Quality
- 6 Important Water Events

章节摘录

版权页：插图：Water quality was evaluated for 176-000km of river reaches in 2010. On the yearly basis, 61.4% of the total evaluated river reaches had a water quality of Classes I~III, which was 2.5 percentage points higher than that in the last year. For provincial-border water bodies, water quality was evaluated for 339 monitoring sites on rivers, of which 51.3% had a water quality of Classes I-III on the yearly basis. In addition, water quality was evaluated for 99 lakes and 437 reservoirs, and 58.9% of the lakes and 78.0% of the reservoirs had a water quality of Classes I, III; and trophic state was evaluated for 99 lakes and 420 reservoirs and 65.7% of the lakes and 30.7% of the reservoirs were in a eutrophic state. Water quality criterion compliance was evaluated for 3,902 waterfunction zones and the rate of criterion compliance reached 46.0% on the yearly basis.
