<<中国国防>>

内容概要

A country is not secure without strong national defense. China has a vast territory. China has a long border line and shore line. In order to safeguard territorial security and peaceful life of the people, strong national defense must be built. The world today is far from being peaceful. Power politics still exists and terrorism still runs wild. Safeguarding national sovereignty and dignity. We must have modernized armed forces. The book provides introductory information on China's national defense. Based on factual accounts, the book gives authoritative answers to the following questions one by one: Features about China's security environment; China's defense mission and policies; The road of defense building that China has taken and its current status; Organizational system, scale and modernization building of China's military forces; Development of China's defense power; Influence on world peace and regional stability, etc.
