章节摘录

版权页： 3.8.3 Financial service-based poverty alleviation Since 2008, the province comprehensively launched the micro-credit projects for poverty alleviation. The provincial financial department arranged 1 million guarantee fee for each of the 29 counties and issued 380 million Yuan of micro-credit loans in 2009, promoted the income growth of 14600 rural households; the number of low-income rural households. village-level pilot mutual funds organizations reached 152, and more than 11000 rural households (including more than 4900 low-income rural households) participated in the organizations. A total of 35 million Yuan of central and provincial financial funds were issued, the equity capital of village-level mutual funds amounted to 46.2 million Yuan and more than 76 million Yuan were issued for rural households to develop production in 15200 batches. The first batch of ten pilot villages including Longquan and Changshan were put into normal operation and 1025 rural households were involved. The mutual funds amounted to 3.7077 million Yuan. 364 households received loans of 2.6805 million Yuan and the average income growth for each household was 4000 Yuan. In 29 counties, a total of 738 million Yuan of loans were issued to rural households based on forest ownership mortgage. All the rural cooperative financial agencies launched pilot agricultural credit risk compensation projects and were encouraged to increase credit support for agriculture. In 2009, the financial department allocated 30.89 million Yuan as agricultural risk compensation funds. Policy agricultural insurance projects were fully launched. Three types of insurance were added, namely dairy cattle, vegetables and forest insurance, the number of the participants reached 228700 and the premium income was 208 million Yuan; a total of 53900 disaster-hit rural households participated in the insurance system and received compensation of 164 million Yuan. The number of rural housing insured farmers reached 10031200, with insured rate above 98.6%.
