

<<非线性光学 第3版>>

图书基本信息

书名：<<非线性光学 第3版>>

13位ISBN编号：9787510024016

10位ISBN编号：7510024013

出版时间：2010-9

出版时间：世界图书出版公司

作者：[美]堡德（Robert W. Boyd）

页数：613

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

前言

It has been a great pleasure for me to have prepared the latest edition of my book on nonlinear optics. My intrigue in the subject matter of this book is as strong as it was when the first edition was published in 1992. The principal changes present in the third edition are as follows : (1) The book has been entirely rewritten using the SI system of units. I personally prefer the elegance of the gaussian system of units , which was used in the first two editions , but I realize that most readers would prefer the SI system , and the change was made for this reason. (2) In addition , a large number of minor changes have been made throughout the text to clarify the intended meaning and to make the arguments easier to follow. I am indebted to the countless comments received from students and colleagues both in Rochester and from around the world that have allowed me to improve the writing in this manner. (3) Moreover , several sections that treat entirely new material have been added. Applications of harmonic generation , including applications within the fields of microscopy and biophotonics , are treated in Subsection 2.7.1. Electromagnetically induced transparency is treated in Section 3.8. Some brief but crucial comments regarding limitations to the maximum size of the intensity induced refractive-index change are made in Section 4.7. The use of nonlinear optical methods for inducing unusual values of the group velocity of light are discussed briefly in Section 3.8 and in Subsection 6.6.2. Spectroscopy based on coherent anti-Stokes Raman scattering (CARS) is discussed in Section 10.5. In addition , the appendix has been expanded to include brief descriptions of both the SI and gaussian systems of units and procedures for conversion between them.

内容概要

It has been a great pleasure for me to have prepared the latest edition of my book on nonlinear optics. My intrigue in the subject matter of this book is as strong as it was when the first edition was published in 1992.

书籍目录

Preface to the Third Edition Preface to the Second Edition Preface to the First Edition

1. The Nonlinear Optical Susceptibility
 - 1.1. Introduction to Nonlinear Optics
 - 1.2. Descriptions of Nonlinear Optical Processes
 - 1.3. Formal Definition of the Nonlinear Susceptibility
 - 1.4. Nonlinear Susceptibility of a Classical Anharmonic Oscillator
 - 1.5. Properties of the Nonlinear Susceptibility
 - 1.6. Time-Domain Description of Optical Nonlinearities
 - 1.7. Kramers-Kronig Relations in Linear and Nonlinear Optics
- Problems
- References
2. Wave-Equation Description of Nonlinear Optical Interactions
 - 2.1. The Wave Equation for Nonlinear Optical Media
 - 2.2. The Coupled-Wave Equations for Sum-Frequency Generation
 - 2.3. Phase Matching
 - 2.4. Quasi-Phase-Matching
 - 2.5. The Manley-Rowe Relations
 - 2.6. Sum-Frequency Generation
 - 2.7. Second-Harmonic Generation
 - 2.8. Difference-Frequency Generation and Parametric Amplification
 - 2.9. Optical Parametric Oscillators
 - 2.10. Nonlinear Optical Interactions with Focused Gaussian Beams
 - 2.11. Nonlinear Optics at an Interface
- Problems
- References
3. Quantum-Mechanical Theory of the Nonlinear Optical Susceptibility
 - 3.1. Introduction
 - 3.2. Schrödinger Calculation of Nonlinear Optical Susceptibility
 - 3.3. Density Matrix Formulation of Quantum Mechanics
 - 3.4. Perturbation Solution of the Density Matrix Equation of Motion
 - 3.5. Density Matrix Calculation of the Linear Susceptibility
 - 3.6. Density Matrix Calculation of the Second-Order Susceptibility
 - 3.7. Density Matrix Calculation of the Third-Order Susceptibility
 - 3.8. Electromagnetically Induced Transparency
 - 3.9. Local-Field Corrections to the Nonlinear Optical Susceptibility
- Problems
- References
4. The Intensity-Dependent Refractive Index
 - 4.1. Descriptions of the Intensity-Dependent Refractive Index
 - 4.2. Tensor Nature of the Third-Order Susceptibility
 - 4.3. Nonresonant Electronic Nonlinearities
 - 4.4. Nonlinearities Due to Molecular Orientation
 - 4.5. Thermal Nonlinear Optical Effects
 - 4.6. Semiconductor Nonlinearities
 - 4.7. Concluding Remarks
- References
5. Molecular Origin of the Nonlinear Optical Response
 - 5.1. Nonlinear Susceptibilities Calculated Using Time-Independent Perturbation Theory
 - 5.2. Semiempirical Models of the Nonlinear Optical Susceptibility
 - Model of Boling, Glass, and Owyong
 - 5.3. Nonlinear Optical Properties of Conjugated Polymers
 - 5.4. Bond-Charge Model of Nonlinear Optical Properties
 - 5.5. Nonlinear Optics of Chiral Media
 - 5.6. Nonlinear Optics of Liquid Crystals
- Problems
- References
6. Nonlinear Optics in the Two-Level Approximation
 - 6.1. Introduction
 - 6.2. Density Matrix Equations of Motion for a Two-Level Atom
 - 6.3. Steady-State Response of a Two-Level Atom to a Monochromatic Field
 - 6.4. Optical Bloch Equations
 - 6.5. Rabi Oscillations and Dressed Atomic States
 - 6.6. Optical Wave Mixing in Two-Level Systems
- Problems
- References
7. Processes Resulting from the Intensity-Dependent Refractive Index
 - 7.1. Self-Focusing of Light and Other Self-Action Effects
 - 7.2. Optical Phase Conjugation
 - 7.3. Optical Bistability and Optical Switching
 - 7.4. Two-Beam Coupling
 - 7.5. Pulse Propagation and Temporal Solitons
- Problems
- References
8. Spontaneous Light Scattering and Acousto-optics
 - 8.1. Features of Spontaneous Light Scattering
 - 8.2. Microscopic Theory of Light Scattering
 - 8.3. Thermodynamic Theory of Scalar Light Scattering
 - 8.4. Acousto-optics
- Problems
- References
9. Stimulated Brillouin and Stimulated Rayleigh Scattering
 - 9.1. Stimulated Scattering Processes
 - 9.2. Electrostriction
 - 9.3. Stimulated Brillouin Scattering (Induced by Electrostriction)
 - 9.4. Phase Conjugation by Stimulated Brillouin Scattering
 - 9.5. Stimulated Brillouin Scattering in Gases
 - 9.6. Stimulated Brillouin and Stimulated Rayleigh Scattering
- Problems
- References
10. Stimulated Raman Scattering and Stimulated Rayleigh-Wing Scattering
 - 10.1. The Spontaneous Raman Effect
 - 10.2. Spontaneous versus Stimulated Raman Scattering
 - 10.3. Stimulated Raman Scattering Described by the Nonlinear Polarization
 - 10.4. Stokes-Anti-Stokes Coupling in Stimulated Raman Scattering
 - 10.5. Coherent Anti-Stokes Raman Scattering
 - 10.6. Stimulated Rayleigh-Wing Scattering
- Problems
- References
11. The Electrooptic and Photorefractive Effects
 - 11.1. Introduction to the Electrooptic Effect
 - 11.2. Linear Electrooptic Effect
 - 11.3. Electrooptic Modulators
 - 11.4. Introduction to the Photorefractive Effect
 - 11.5. Photorefractive Equations of Kuldatarev et al.
 - 11.6. Two-Beam Coupling in Photorefractive Materials
 - 11.7. Four-Wave Mixing in Photorefractive Materials
- Problems
- References
12. Optically Induced Damage and Multiphoton Absorption
 - 12.1. Introduction to Optical Damage
 - 12.2.

<<非线性光学 第3版>>

Avalanche-Breakdown Model 12.3. Influence of Laser Pulse Duration 12.4. Direct Photoionization 12.5. Multiphoton Absorption and Multiphoton Ionization Problems References 13. Ultrafast and Intense-Field Nonlinear Optics 13.1. Introduction 13.2. Ultrashort Pulse Propagation Equation 13.3. Interpretation of the Ultrashort-Pulse Propagation Equation 13.4. Intense-Field Nonlinear Optics 13.5. Motion of a Free Electron in a Laser Field 13.6. High-Harmonic Generation 13.7. Nonlinear Optics of Plasmas and Relativistic Nonlinear Optics 13.8. Nonlinear Quantum Electrodynamics Problem References Appendices A. The SI System of Units Further reading B. The Gaussian System of Units Further reading C. Systems of Units in Nonlinear Optics D. Relationship between Intensity and Field Strength E. Physical Constants Index
