

<<Cn单位球上的函数理论>>

图书基本信息

书名：<<Cn单位球上的函数理论>>

13位ISBN编号：9787510052699

10位ISBN编号：7510052696

出版时间：2013-1

出版人：世界图书出版公司

作者：鲁丁

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<Cn单位球上的函数理论>>

内容概要

数学

<<Cn单位球上的函数理论>>

作者简介

作者:(美)鲁丁

<<Cn单位球上的函数理论>>

书籍目录

List of Symbols and Notations Chapter 1 Preliminaries 1.1 Some Terminology 1.2 The Cauchy Formula in Polydiscs 1.3 Differentiation 1.4 Integrals over Spheres 1.5 Homogeneous Expansions Chapter 2 The Automorphisms of B 2.1 Cartan's Uniqueness Theorem 2.2 The Automorphisms 2.3 The Cayley Transform 2.4 Fixed Points and Affine Sets Chapter 3 Integral Representations 3.1 The Bergman Integral in B 3.2 The Cauchy Integral in B 3.3 The Invariant Poisson Integral in B Chapter 4 The Invariant Laplacian 4.1 The Operator 4.2 Eigenfunctions of Δ 4.3 Harmonic Functions 4.4 Pluriharmonic Functions Chapter 5 Boundary Behavior of Poisson Integrals 5.1 A Nonisotropic Metric on S 5.2 The Maximal Function of a Measure on S 5.3 Differentiation of Measures on S 5.4 K-Limits of Poisson Integrals 5.5 Theorems of Calderón, Privalov, Plessner 5.6 The Spaces $N(B)$ and $H^p(B)$ 5.7 Appendix: Marcinkiewicz Interpolation Chapter 6 Boundary Behavior of Cauchy Integrals 6.1 An Inequality 6.2 Cauchy Integrals of Measures 6.3 Cauchy Integrals of LP-Functions 6.4 Cauchy Integrals of Lipschitz Functions 6.5 Toeplitz Operators 6.6 Gleason's Problem Chapter 7 Some LP-Topics 7.1 Projections of Bergman Type 7.2 Relations between H^p and L^p 7.3 Zero-Varieties 7.4 Pluriharmonic Majorants 7.5 The Isometries of $HP(B)$ Chapter 8 Consequences of the Schwarz Lemma 8.1 The Schwarz Lemma in B 8.2 Fixed-Point Sets in B 8.3 An Extension Problem 8.4 The Ljapunov-Dirichlet Theorem 8.5 The Julia-Carathéodory Theorem Chapter 9 Measures Related to the Ball Algebra 9.1 Introduction 9.2 Valskii's Decomposition 9.3 Henkin's Theorem 9.4 A General Lebesgue Decomposition 9.5 A General F. and M. Riesz Theorem 9.6 The Cole-Range Theorem 9.7 Pluriharmonic Majorants 9.8 The Dual Space of $A(B)$ Chapter 10 Interpolation Sets for the Ball Algebra 10.1 Some Equivalences 10.2 A Theorem of Varopoulos 10.3 A Theorem of Bishop 10.4 The Davis-Kakutani Theorem 10.5 Smooth Interpolation Sets 10.6 Determining Sets 10.7 Peak Sets for Smooth Functions Chapter 11 Boundary Behavior of H^p -Functions 11.1 A Fatou Theorem in One Variable 11.2 Boundary Values on Curves in S 11.3 Weak*-Convergence 11.4 A Problem on Extreme Values Chapter 12 Unitarily Invariant Function Spaces 12.1 Spherical Harmonics 12.2 The Spaces $H^p(\mathbb{S}^n, q)$ 12.3 U -Invariant Spaces on S 12.4 U -Invariant Subalgebras of $C(S)$ 12.5 The Case $n = 2$ Chapter 13 Möbius-Invariant Function Spaces 13.1 U -Invariant Spaces on S 13.2 U -Invariant Subalgebras of $C_o(B)$ 13.3 U -Invariant Subspaces of $C(\mathbb{S}^n)$ 13.4 Some Applications Chapter 14 Analytic Varieties 14.1 The Weierstrass Preparation Theorem 14.2 Projections of Varieties 14.3 Compact Varieties in C^n 14.4 Hausdorff Measures Chapter 15 Proper Holomorphic Maps 15.1 The Structure of Proper Maps 15.2 Balls vs. Polydiscs 15.3 Local Theorems 15.4 Proper Maps from B to B 15.5 A Characterization of B Chapter 16 The $\bar{\partial}$ -problem 16.1 Differential Forms 16.2 Differential Forms in C^n 16.3 The $\bar{\partial}$ -problem with Compact Support 16.4 Some Computations 16.5 Koppelman's Cauchy Formula 16.6 The $\bar{\partial}$ -problem in Convex Regions 16.7 An Explicit Solution in B Chapter 17 The Zeros of Nevanlinna Functions 17.1 The Henkin-Skoda Theorem 17.2 Plurisubharmonic Functions 17.3 Areas of Zero-Varieties Chapter 18 Tangential Cauchy-Riemann Operators 18.1 Extensions from the Boundary 18.2 Unsolvable Differential Equations 18.3 Boundary Values of Pluriharmonic Functions Chapter 19 Open Problems 19.1 The Inner Function Conjecture 19.2 RP-Measures 19.3 Miscellaneous Problems Bibliography Index

<<Cn单位球上的函数理论>>

编辑推荐

《Cn单位球上的函数理论》(作者鲁丁)是springer数学经典教材系列之一，表述清晰易懂，自然流畅，用很少的实分析、复分析和泛函分析基本知识做铺垫，全面介绍了球上基本原理。既是一本很好的参考书，又是一本高年级教程。
