<<体质人类学>>

内容概要

China won the right to host the 16th IUAES World Congress in July , 2003. After six years of preparation , the Congress will be held in Kunming , China during July 27-31 , 2009. The International Union of Anthropological and Ethnological Sciences (IUAES) was established on August 23 , 1948 , when it merged , in fact , with the International Congress of Anthropological and Ethnological Sciences (ICAES) , which was founded in 1934. The latter was the product of various Congresses of Anthropological Sciences , starting in 1865. The IUAES is one of the member organizations of the International Social Science Council (ISSC) and also of the International Council for Philosophy and Humanistic Studies (ICPHS) .

章节摘录

版权页：插图：We can get the messages of thickness of subcutaneous fat, reveal the distribution pattern of the subcutaneous fat, judge an individual being fat or thin, calculate body moity according to the measurement of skin-fold thickness, thus, thickness of subcutaneous fat is an important index to reflect body's nutritional status. Body fat distribution and its body weight percentage may present respective feature in different pcoplc for their diversity in genetic constitution, living environment or eating habit, etc. Now, considerable scholars arc doing research on various nation group, however, Han people in Henan village is not involved. To exactly evaluate their nutritional status and developmental level, and to enrich constitution data.
