

<<选择力学概略>>

图书基本信息

书名：<<选择力学概略>>

13位ISBN编号：9787513301237

10位ISBN编号：7513301239

出版时间：2011-4

出版时间：新星出版社

作者：金松寿,闫克平,唐睿康

页数：234

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

## 内容概要

Chinese architecture after reform and opening sprung from a discussion of national style. Although we were finally able to lift the veil placed over our eyes and gradually expose ourselves to Western architecture, there was a dilemma. Would our architecture be uniquely Chinese? Or would it be entirely Westernized?

Facing the transformation of our culture, we hoped to move forward by leaps and bounds, but traditional thinking made us hesitate. The Beijing Fragrant Hills Hotel, Qufu Queli Hotel, Lhasa Hotel, and others have a distinctly Chinese mood. Articles from the 1980s editions of Architectural Journal were titled as "Modern Style and a Link to the Past," (by Qi Kang), "Using Architecture to Record our Mighty Era" (by Yin Peitong). First published in August 1979, "The Architect" concentrated on translating architectural essays and research papers. In 1983, Peng Yigang's "Unified Theory of Building Spaces" was published, marking China's first formal inquiry into architecture. The rebirth of architectural discussion indicated that even as we were sweeping away the remains of the Great Leap Forward era, we were beginning to think rationally. As nationalistic voices in the discussion gradually softened, the Chinese architectural world looked toward "foreign experience." In "Thinking between History and the Future," Tai Ning wrote, "Modern Chinese architecture is happening in the narrow alleys between tall buildings. If we don't use reform and opening to bravely assimilate the outside culture of modern, which is Western architecture, it will be impossible for modern Chinese architecture to achieve a breakthrough." Indeed, with such a vast cultural history, innovation was not an easy task. With the Beijing Palace Peninsula Hotel and Asian Games Village, we attempted to fuse together an exploration of Chinese spirit and modernism, but in practice this was more the transplantation of foreign culture on a multi-coexistence foundation.

### 作者简介

金松寿 我国著名的量子化学及化学动力学专家，第20届和21届中国化学学会理事，浙江省化学学会副理事长。

对催化剂集团结构适应理论、无机盐溶解度规律有较深研究，提出分子间存在选择性作用力的理论。1978年获全国科学大会奖，1985年获国家科技进步三等奖，还获“国家著名老教授”荣誉。

著有《量子化学应用简程》、《化学动力学》、《有机催化》、《选择性分子间引力和集团结构适应性》、《控制论化学和应用》等十几部著作。

闫克平 高级工程师。

唐睿康 浙江大学化学系教授，博士生导师，浙江大学生物物质与信息调控研究中心主任。

## 书籍目录

Preface  
 Architecture Takes on the World  
 30 Years of Chinese Architecture  
 Chapter I : Cultural Architecture  
 With Resonance  
 Memorial for Compatriots Killed in the Nanjing Massacre by Japanese Forces of Aggression  
 The Dignity of a Four—sided Compound  
 The Chinese Academy of Sciences Library  
 A Ray of Light , a Stone , a World  
 Chengdu Luyeyuan Stone Sculpture Art Museum  
 Lost Thought  
 Zhejiang Tiantai Museum  
 Cinderella ' S Transformation  
 Shanghai Museum of Contemporary Art  
 A Place to Start Events  
 The Ningbo Museum of Art  
 An Eastern Institute  
 Feng Jicai Culture and Art Research Institute of Tianjin University  
 A Vessel for the Spirit  
 Longshan Church " Shanxi Courtyard " Garden  
 Qingshui Hall  
 Contemporary Aesthetics Break in Indigenous Culture  
 Songzhuang Museum of Art  
 The Suzhou Museum  
 The Delight of History  
 Exhibition Hail of The Jiangnan Command Center of the New Fourth Army,  
 Jiangsu Province  
 Form from Function  
 The Library of the Shunde Cultural Center  
 Library on the Water  
 Qingpu Library,  
 Puyang Courtyard  
 Post-modern Wonders  
 Dafen Village Art Museum , Shenzhen  
 Preserving History and Branding Rejuvenation  
 Beijing Today Art Museum  
 Seeds of Art in the Desert  
 The Art Museum of Ordos , Inner Mongolia  
 " Coming into the World " and " Going into the World " Ningbo Urban Exhibition Center  
 An Ancient Boat  
 The Ningbo Museum  
 Chapter 2 : Educational Architecture  
 Modern Architecture Blending into the Environment  
 Beijing Foreign Language Teaching and Research Press Building  
 Between Mountains and Water  
 Suzhou University Wenzheng College Library  
 More Clear, More Powerful  
 Nanjing University Taoyuan#2 Graduate Student Apartments  
 Sustainable Development in Localized Architecture  
 Lijiang , Yunnan Jade Lake Wanxiao Hope Primary School  
 Striving through a " Garden " Shanghai Qingpu Xiayu Kindergarten  
 Courtyard on the Roof of the World  
 Ngari Apple Primary School  
 Architecture in the Background  
 Beijing Baizwan Kindergarten and Middle School  
 The Poetry of Architecture  
 China Academy of Art , Xiangshan Campus  
 The Space " Between " Global Institute of Software Technology  
 Chapter 3 : Public Architecture  
 The " Chinese spirit " of modern architecture  
 Bank of China , Beijing  
 Vehicle for Open , Flexible Democracy  
 Shenzhen Municipal Planning Bureau Office  
 The dynamic equilibrium between architecture and the city  
 Shanghai Municipal Higher People ' s Court  
 Beijing , a Step Back in the Past  
 Beijing Desheng Up-town Office Area  
 Respect the City , Dialogue with Your Surroundings  
 Changfa Center  
 Nanjing  
 Precise Dimensions . Rich Detail  
 Qingpu Shanghai Construction Exhibition Center  
 From Engineering to Architecture  
 Chongqing Tong Yan Lin International Design Center.....

## 章节摘录

The Today Art Museum is located in the center of Beijing's CBD in Chaoyang District. Its avant-garde style truly makes it stand out against its environment--its fusion of older industrial concepts with modern themes creates a distinctive aesthetic quality. The design was based on the conceptual analysis of the transforming of old urban architecture and on the traits of original external features of old buildings and internal functions. Wang Hui thus implemented a series of design work from taking into perspective both the whole product and all the minute details.

High-speed development and construction in the business center area of the city has all but wiped out any traces of the original character of the area. There were two reasons that Wang Hui chose the CBD as his site to transform an old building into a new space for the arts. The first is that he wanted to preserve some of the flavor of the old buildings. The second is consideration of the ecological relationship between art, architecture, and the inhabitants of a community. The project Wang undertook, which bears the double burden of commerce and culture, is full of challenges. The new Today Art Museum was originally the boiler room of the Beijing Beer brewery. The old boiler room is located at the northeast corner of the Pingod residential complex, easily accessible from the adjoining road. Furthermore, the spatial configuration of the boiler room was exceptional. The roof comes in at 12 meters high, creating a perfect atmosphere for exhibiting works of modern art. Also, as it was originally the location of giant boilers, the space was already able to bear the weight load of giant displays of art or large pieces of equipment.
