章节摘录

Teaching methods usually incorporate a view of L2 learning , whether implicitly or explicitly. Grammar-translation teaching , for example , emphasizes explanations of grammatical points because this fits in with its view that L2 learning is the acquisition of conscious knowledge. Communicative teaching methods require the students to talk to each other because they see L2 learning as growing out of the give-and-take of communication. For the most part , teaching methods have developed these ideas of learning independently from SLA research. They are not based , for example , on research into how learners use grammatical explanations or how they learn by talking to each other. More information about how learners actually learn helps the teacher to make any method more effective and can put the teacher's hunches on a firmer basis.
