章节摘录

It seems that there will never have been a civilization without toys , but when and how toys developed is still unknown by most of us. Maybe they just came about to give children something interesting to do. In the ancient time , as it is nowadays , most boys liked to play with some kinds of toys and most girls with another. In such societies where social roles are rigidly determined , boys often pattern their play after the activities of their fathers and girls after the tasks of their mothers. This is true in that boys and girls are getting prepared to step into the roles and responsibilities of the adult world. What is remarkable about the toy history is not so much how they altered over the centuries but how much they have remained the same. These changes have been mostly in terms of craftsmanship , mechanics , and technology. It is the universality of the toys as to their development in all parts of the world and their persistence to the present that is amazing. In Egypt , the Americas , China , Japan and among the Arctic ( 北极的 ) peoples , generally the same kinds of toys appeared.

编辑推荐

《王迈迈英语：轻松搞定大学英语4级考试·仔细阅读（升级版）》如果您使用过各种高考复习资料，但成效不大，请您使用王迈迈图书品牌系列丛书，热烈祝贺王迈迈英语取得两项国家专利。
