章节摘录

Thousands of years ago in Egypt , kings built the pyramids. They used to build them as their ( 39 ) \_\_\_\_\_ would help them find life after death. They also wanted the world to remember them as important people. Some pyramids were for ( 40 ) \_\_\_\_\_. But they are less interesting because they are not as big. The oldest ( 41 ) \_\_\_\_\_ that we know today is the pyramid near Sahara in Egypt. It is about 5 , 000 years old. There are many pyramids along the Nile River. The largest is the pyramid of Khufu. It is made of two million three hundred thousand huge stones , most of them higher than a person. It is about 144 meters ( 42 ) \_\_\_\_\_. Inside the pyramid are the burial rooms for the king and queen and long passageways to these rooms , the rest of the pyramid solid stone. Workers usually built the pyramids when they could not work on their farms. To build the pyramid of Khufu , 100 , 000 men worked for 20 years. ( 43 ) \_\_\_\_\_ in the pyramids. Robbers went into the pyramids and took many of these treasures. Today some of the treasures are in museums though.
