章节摘录

When one does something, he should not think or worry about anything else. When his mind is concentrated on one particular thing, it will surely yield good results. Through constant repetition of a daily program, one can go on with his regular work without any difficulties. Moreover, one cannot work all day long. Play is as necessary to everybody as work. Play can make one fresh and cheerful so that one may not be sick of his work. In conclusion, the proverb should be a good motto for everybody.

The Right Use of Money? 正确使用金钱 Every man knows the value of money. Nothing can be bought without money. It is so useful that it is loved by every man. But money is an evil when wrongly used. It may bring you sadness, misery, and even ruin. You should not waste your money in gambling, smoking, dancing, or drinking. On the other hand, you should avoid being enslaved by money or becoming a miser, who loves money too much. Money is an active thing. It should not be kept idle. You should use your money in doing something good. It is better to put it in sound investment than in speculation. To live demands money. To live within your income is good economy. Happy are those who act upon this rule. To save money is far better than to waste it. In short, you should use your money properly. Those who use it properly will find the way to success. You should get it properly, keep it safely, and spend it cleverly. The right use of money may bring you a comfortable life and a cheerful heart.

In China, most people take a positive attitude towards the one-child family. On the one hand, to have one-child benefits the family. It can reduce the economic burden of the family and the child can be taken good care of and get good education. On the other hand, to have one child is advantageous to the country. Overpopulation has become a serious problem, especially in developing countries. It is certain that the one-child family tends to control population growth, thus promoting the economic development of the nation. However, there are also some negative views about the one-child family. Some people say that it may result in some social problems in the future. For instance, the parents will feel lonely if their child gets married. Furthermore, parents tend to spoil their only child. Comparing the different views, we can see quite clearly that the one-child family has many more advantages. It benefits people as well as the country. Besides, it is of vital importance to the realization of our four modernizations.

Model 15 China's Unemployment Today? 中国目前的失业现象 With the reform of state-owned enterprises entering a critical stage, the number of unemployed people is going up in China. The government helps most large-and-medium-sized-state-owned enterprises currently suffering losses to improve efficiency through laying off their redundant employees. The laid-off workers consist of some elder-aged workers, unskilled or less-skilled workers, uneducated or illiterate workers, etc. But some managers are laying off employees randomly rather than giving them good reasons for their dismissal. In my point of view, laying off the redundant employees does solve the overstaffing problem of state-owned enterprises and help them raise efficiency and improve competing ability. But the government should setup reemployment project to help them find jobs. Otherwise, the social stability will be challenged.

Model 16 The Favorable Effects of Tourism? 旅游业的有利影响 Tourism is now becoming a boom industry in many countries. It is obvious that it enhances the development of hotels and shopping facilities, and this creates jobs for local people. It also creates a large market for famous products of the local place. Since visitors are especially fond of specialties of the resorts, quite some new industries develop rapidly to meet the demands. As a result, it brings prosperity to the region. The arrival of visitors always results in the improvements in the local transportation devices such as airports, railroads, roads and docks. The local government may invest a lot in building and landscaping amusement parks, zoos, and other amenities in order to attract more tourists. Local people benefit a lot from these improvements. With the frequent contact between people from different places and different nations, the exchange of culture and science is sure to be promoted. It may lead to a better understanding of people all over the world.

Model 17 Pets. 宠物 A pet is an animal kept by a person as a companion. Recently, more and more people, old ones in particular, like to enjoy the company of tame animals. They treat these animals as good friends or even as members of the family. Pets are affectionate. They are obedient to their masters. They appreciate the care given to them and seem to know how to express their thanks.
