## 内容概要

阅读理解能力是衡量外语水平的重要标志之一，对绝大多数学生来说，阅读理解，也是他们将来直接运用外语的一个最重要的渠道。

各类各级英语考试中，对阅读理解能力的考察，均居各题型之首。

而且，完形填空、阅读表达、阅读填空等题型，其实质也是在考查学生们的阅读理解能力。

可以说阅读理解能力的高低，是能否取得高考英语好成绩的关键。

纵观近几年各省市高考英语卷中阅读理解的题，考生的平均得分率一直较低。

并不是因为生词和句子读不懂，而是由于考场紧张，理解较浅，造成答题失分。

因此，要想提高阅读理解得分，不仅要打好英语基础，还要掌握考试的出题思路、出题规律以及各类型题的解题技巧，强化训练临场考试经验。

## 书籍目录

Unit 1 Popular science and modern technology Passage A Passage B Passage C Passage D Passage E  
 Unit 2 Society Passage A Passage B Passage C Passage D Passage E  
 Unit 3 Plans and intentions Passage A Passage B Passage C Passage D Passage E

 Unit 23 Topical issues Passage A Passage B Passage C Passage D Passage E  
 Unit 24 Language learning Passage A Passage B Passage C Passage D Passage E

答案与解析

## 章节摘录

Nowadays skin cancer has become the most common form of cancer. Actually there are three types of skin cancer: basal cell cancer, squamous (鳞状的) cell cancer and melanoma. Melanoma is less common compared with the other two. However, it is the most dangerous skin cancer among the three. What is skin cancer?

You may wonder. It is a disease in which cancer cells are found in the outer layers of your skin. It commonly happens to people with light colored skin who have spent lots of time in the sunlight. While your health benefits from sunshine because it provides your body with Vitamin D, exposure to too much sunlight is not a good thing. Skin cancer can occur everywhere on your body, and it often occurs in your face, neck, hands, and arms as these places have been exposed to more sunlight. It is necessary for you to know the warning signs of the disease. Look closely at your body. A change in color or shape of moles could be one of the early signs of skin cancer. Besides, keep an eye on wounds or cuts which will not heal. If you've got such a cut or a wound on your skin, go to see a doctor. Don't be embarrassed!

This is how this type of cancer often begins and the earlier the diagnosis the better the prognosis. You cannot afford to be shy when it comes to your health!

For prevention, you should cover as much skin as possible, apply sun lotion to all exposed skin, and avoid sunlight between 10 a.m. and 4 p.m. Take the time to learn the skin warning signs and have your doctor check any suspicious skin markings and any changes in the way your skin looks. Be ready to do your part in an early stage to fight it successfully. Experts say this disease is not just caused by us sitting out in the sun too long. There are many factors that can explain why some people will eventually experience this type of cancer.
