## 章节摘录

Features of the Shadow Puppet Show Shadow puppetry wins the heed of an audience by its lingering music, exquisite sculpture, brisk color and lively performance. One mouth tells stories of thousands of years; a pair of hands operates millions of soldiers. This is how the shadow puppeteer works. Nicknamed the business of the five, a shadow puppet troupe is made up of five people. One operates the puppets, one plays Q horn, a horn, and a yueqin, one plays banhu fiddle, one is in charge of percussion instruments, and one sings. This singer assumes all the roles in the puppet show, which of course is very difficult. That is not all; the singer also plays several of the over 20 kinds of musical instruments in a puppet show. These ancient musical instruments enhance the effect of this ancient folk art. The stage for shadow puppet is a white cloth screen on which the shadows of fiat puppets are projected. Shadow puppet looks similar to pQper-cut except that their joints are connected by thread so that they can be operated freely. The scene is simple and primitive; it is the consummate performance that attracts the audience. For example, a puppet can smoke and breathe out a smoke ring under the control of the operator. In one drQma, as a maid sits in front of a mirror, her reflection in the mirror matches her Qctions. The operator plays five puppets at the same time, each of which has three threads. Ten fingers handle 15 threads.
