前言

Businesspeople must be prepared to perform tasks that only people can perform in particular, they must be able to communicate, to think, and to make solid, well-informed decisions. Decision making is the critical skill in today's business world, and Management Accounting helps students to better use accounting information to improve their decisionmaking skills. This text provides a solid management accounting foundation within the context of business and business decisions. Readers will explore accounting information's role in the decision making process and learn how to use the accounting information typically provided to company managers. Seeing how accounting information can be used to make better business decisions will benefit all students, regardless of their major course of study or chosen career. This text is purposely written so students will find it easy to read and understand. The conversational tone of the text and the logical presentation of topics all contribute to the ability of this text to meet that goal. In addition, we have included the exhibits necessary to get important points across, but we intentionally have not included an array of glitz and graphics that can break up the flow and distract student attention. Generally, we have not segregated material into special presentation boxes that might be skipped by students attempting to focus on the most relevant points. All of the points of interest and examples we present are woven into the body of the text.

内容概要

Management Accounting by Michael Werner and Kumen Jones introduces students to a full array of management accounting subjects and presents them in a very understandable fashion, for students, the book is purposely written to be easy to read and comprehend. For instructors, each chapter is supported by a variety of teaching manuals and supplements including a complete set of PowerPoint slides covering both concepts and calculations. The amount of assignment material is extensive so it provides a wide variety of problems and questions instructors can use as class examples and students can use to practice and learn. This book is based on a successful management accounting text published by Pearson/Prentice Hall in the United States. What sets it apart from other management accounting books is that it is a U.S. text, published by a recognized Chinese publisher, LiXin Accounting Publishing House. This book is published entirely in China and priced to be affordable for Chinese students. It offers a winning combination of quality coverage, teaching support, and affordability.

Instructors will feel confident they have selected the right book when their students are learning the material, and the teaching resources available to adopters support them in the classroom—all this at an affordable price.

 Challenges and Trends in Management Accounting Consumers of Management Accounting Information
 Summary Glossary of Key Terms Review the Facts Apply What You Have Learned
 CHAPTER 2 Classifying Costs Major Cost Classifications Assigning Costs to Cost Objects
 Product Cost Period Cost Selling Cost Administrative Cost Comparing Product and Period Costs
 Product Cost Identification For Merchandising Firms The Flow of Product Cost—Merchandising
 Company Cost of Goods Sold Product Cost Identification for Manufacturing Firms Prime Cost and Conversion
 Cost Inventory Classifications Raw Materials Inventory Work-in-process Inventory Finished Goods Inventory
 Direct Material Direct Labor Manufacturing Overhead Indirect Material Indirect Labor Other Manufacturing
 Overhead Costs The Flow of Product Cost—Manufacturing Company Cost of Goods Manufactured
 Product Cost Identification for Service Firms Materials Labor Overhead or Indirect Service Costs
 The Flow of Service Cost—service Company Cost of Services Hybrid Firms Merchandising, Manufacturing,
 and Service—a Comparison Summary Appendix—Recording Manufacturing Costs Appendix Summary
 Glossary of Key Terms Review the Facts Apply What You Have Learned
 CHAPTER 3 Determining Costs of Products Accumulating Product Cost—Cost Accounting
 Units of Product As Cost Objects Product Costing Methods Job Order Costing Basics
 Process Costing Basics Job Order Costing Documentation Relating to Job Order Costing
 Cost Information for Raw Material Cost Information for Direct Labor Manufacturing Overhead
 Over or Under Applied Manufacturing Overhead Process Costing Equivalent Units
 Cost Per Equivalent Unit Cost of Ending Work-in-Process Inventory Cost of Completed Units
 Summary Appendix—Recording Manufacturing Costs Appendix Summary Glossary of Key Terms
 Review the Facts Apply What You Have Learned
 CHAPTER 4 Cost Allocation and Activity Based Costing Traditional Manufacturing Overhead Allocation
 Activity-based Costing for Manufacturing Overhead Allocation Determining Product Cost Using ABC
 Comparison of Traditional and ABC Overhead Allocation Product Cost Accuracy When Does ABC
 Result in More Accurate Product Costs? Reducing Cost by Using ABC Closer Cost Scrutiny
 Smaller Cost Pools Make it Difficult to Hide Cost Cost Control by Controlling the Allocation
 Base Added Complexity and Cost of ABC ABC and Job Order Costing—Another Look at Manta
 Power Boats Summary Glossary of Key Terms Review the Facts Apply What You Have Learned
 CHAPTER 5 Cost Behavior Common Cost Behavior Patterns Fixed Costs Variable Costs
 Comparison of Cost Behaviors Determining Total Cost Relevant Range Mixed Costs Identifying the
 Fixed and Variable Elements of a Mixed Cost The Engineering Approach Scatter Graphing
 The High-Low Method Regression Analysis Microsoft Excel—Preparing an Excel Scatter Graph
 119 Summary Glossary of Key Terms Review the Facts Apply What You Have Learned
 CHAPTER 6 Business Decisions Using Cost Behavior The Contribution Income Statement
 Absorption and Variable Costing Purpose of the Contribution Income Statement Predicting
 Profits Using the Contribution Income Statement Cost-Volume-Profit Analysis Break-Even
 Determining Sales Required to Meet a Profit Objective Cost-Volume-Profit Graph Sensitivity
 Analysis Change in Selling Price Change in Variable Cost and Fixed Cost Multiple Products
 and CVP Break-Even Point in a Multiproduct Situation Determining Required Sales in a
 Multiproduct Situation CVP Assumptions Absorption and Variable Costing—a Closer Look
 Summary Glossary of Key Terms Review the Facts Apply What You Have Learned
 CHAPTER 7 Making Decisions Using Relevant Information Relevant Costs and Benefits
 Equipment Replacement Gather All Costs and Benefits Associated with the Decision
 Determine the Relevant Cost and Benefit of Each Alternative Relevant Cost and Benefit of the
 Old Computer System Relevant Costs and Benefits of the Replacement System Compare the

Relevant Information and Select an Alternative
The Concept of an Incremental Cost or Benefit
Interest-the Time Value of Money
Special Orders
Gather All Costs and Benefits Associated with the Decision
Determine the Relevant Cost and Benefit of Each Alternative
Compare the Relevant Costs and Benefits and Select an Alternative
Outsourcing: The Make or buy Decision
Gather All Costs Associated with the Decision
Determine the Relevant Cost of Each Alternative
Compare the Relevant Costs and Select an Alternative
Considering Opportunity Costs
Discontinuing a Business Segment
Determine the Relevant Cost of Each Alternative
Special Cost Considerations for Common Fixed Costs
Summary
Glossary of Key Terms
Review the Facts
Apply What You Have Learned
CHAPTER 8 The Capital Budget: Evaluating Capital Expenditures
The Business Planning Process
The Mission——Overall Company Goals: The Why
Nonfinancial Goals
Financial Goals
Goal Awareness
Core Values: What the Company Stands For
Vision: The Hope for the Future
Strategy: The Business Plan of Attack
The Strategic Plan: The What
The Capital Budget: The How
The Operating Budget: The Who
The Capital Budget: What is it?
Capitalizing Assets
Capitalization Amount
Characteristics of Capital Projects
The Cost of Capital and the Concept of Scarce Resources
Weighted Average Cost of Capital
Scarce Resources
Evaluating Potential Capital Projects
Identifying Possible Capital Projects
Determining Relevant Cash Flows for Alternative Projects
Selecting a Method of Evaluating the Alternatives
Selecting Capital Budgeting Projects
Capital Budgeting Decision Methods
Discounted Cash Flow Methods
Net Present Value
Net Present Value Calculations with Uneven Cash Flows.....
CHAPTER 9 The Operating Budget Part One: An Overview of the Operating Budget
Part Two. Preparing and Using the Operating Budget
CHAPTER 10 Standard Costing
CHAPTER 11 Evaluating Performance and Emerging Management and Accounting Techniques
Glossary of Key Terms
Company Index
Management Accounting

章节摘录

插图：As companies grew in size and complexity in the first third of the 20th Century, owners developed methods to measure the conversion of raw materials into units of finished product. These methods were the foundation for present-day management accounting in the west. The scientific management movement had a tremendous influence on business management and management accounting. As companies diversified, their owners could not directly manage all the various business operations and because they relied on others to manage operations, they obtained additional management accounting information from the various parts of the business so they could plan, control, and evaluate performance. Companies in China have been able to learn from the experience of companies in the West and have adopted certain management accounting techniques, particularly from the US, in order to secure a strong position in the competitive international markets. China has some unique challenges in the development of management accounting techniques as its economy continues to develop. For one thing, management accounting systems in China are significantly different from those of the West, due to the development stage of its market economy. Another challenge is the increased presence of foreign multinational enterprises. To enable Chinese local firms to maintain a competitive advantage they have had to adopt the advanced and integrated management accounting systems and techniques used by the multinational companies. In addition, business enterprise, and therefore management accounting in China is challenged by uneven development of various regions within the country. Currently managers and accountants in the U. S. are implementing or at least considering various new operating methods, which has led to adoption of new techniques in management accounting. Activity-based costing (ABC), balanced scorecard, are just a few of the management accounting techniques that many American industries have adopted over the past two decades in an effort to restore their ability to compete in today's global marketplace. To make effective decisions, business managers must understand the firm's management accounting system, Decision making by its very nature is forward-looking, and the future always contains an element of uncertainty. Management accounting provides useful information that helps managers to reduce the amount of that uncertainty.
