<<语言测试的设计与评估>>

内容概要

An understanding of the principles of test construction has become increasingly important for many people involved in language teaching. This book, by three leading professionals.clearly describes and illustrates up-to-date principles of test design, construction and evaluation. Each chapter deals with one stage of the test construction process; drawing up specifications writing test items, test papers and moderation trialing draft tests training test markers and administrators monitoring examiner reliability reporting results validation writing reports on tests feedback, research and improving/developing tests In the final chapter, current practice in the examining of English as a foreign language(EFL) Language Test Construction and Evaluation will be invaluable for anyone who wishes to understand how language tests are , and should be , constructed.
