章节摘录

Alexandre Dumas was a force of nature. A robust, roaring man of vast appetites and even vaster energies, he cries out to be measured in cubits rather than the feet and inches that are used for mere mortals. For forty years, sparks from his mighty anvil lit fires which inflamed the world and burn still. D'Artagnan and Edmond Dantes are the stuff of dreams. He was born in 1802 at Villers-Cotterets, about fifty miles north-east of Paris, the second child of an innkeeper's daughter and of one of Napoleon's most remarkable generals. Thomas-Alexandre Davy de la Pailleterie was born at Saint Domingo in 1762, the son of a French marquis and Marie-Cessette Dumas, a negress. Disowned by his father, he took his mother's name, enlisted as a private soldier in 1786 and rose rapidly through the ranks during the early Revolutionary campaigns. A courageous and dash-ing field officer, he usually had more to say for himself than was politic. In 1799, he quarrelled with Napoleon and never regained his favour, nor did he receive the army pay that was due to him. He died poor in 1806, leaving his wife and children to manage as they could. At the schools which he attended with no great enthusiasm, young Alexandre, who inherited all his father's drive and (as caricaturists were later to emphasize) some of his negroid features, learned at least to write a good hand. It was for his handwriting rather than through his father's old friends that he found work as a none-too-diligent minor clerk。
