## <<机电工程专业英语>>

### 内容概要

本书以培养学生专业英语能力为主要目标。

全书共分六个部分，主要内容为机械零件和设计，机床和加工，质量和生产率，制造工程和自动化，现代制造技术及其发展、教育。

本书具有较强的实用性和知识延伸性。

本书既可作为高等学校机电工程、机械设计制造及自动化、机械工程及自动化等专业学生的教材，也可供从事上述专业的工程技术人员学习、参考之用。

书籍目录

1 Machine Components and Design 1. Couplings, Clutches, Shafts and Springs 2. Lubrication 3. Machine Tool Frames 4. Threaded Fasteners 5. Turbine Engine Bearings for Ultra-High Temperatures 6. Engineering Graphics 7. Working Drawings 8. Engineering Design 9. Engineering Design and Safety Factors 10. Mechanical Design 11. Product Liability Prevention 12. Responsibility, Liability, and Litigation2 Machine Tools and Machining 13. Grinding Machines 14. Lathes 15. Motors and Drivers 16. Electric Drives 17. Machine Tool Motors 18. Machining 19. Numerical Control 20. Choice of Manual or CNC Machine Tools 21. Hard—Part Machining with Ceramic Inserts 22. Nontraditional Manufacturing Process 23. Design Considerations for NC Machine Tools3 Quality and Productivity 24. Quality in Manufacturing 25. Quality in the Modern Business Environment 26. Design and Manufacturing Tolerances 27. Product Reliability Requirements 28. Product Reliability 29. Productivity in Manufacturing 30. Taking a Chance on Teams 31. Employees Take Charge of Their Jobs 32. Accelerating Development with Acquired Technology4 Manufacturing and Automation 33. Careers in Manufacturing 34. Numerical Control Software 35. Computers in Manufacturing 36. Automated Assembly Equipment Selection 37. Motion Control Advances Assembly 38. Shortcuts to the Design of Precision Tooling 39. Versatility of Modular Fixturing 40. Product Design for Manufacture and Assembly 41. Design for Manufacturing 42. Determining the Cost of a Product5 Modern Manufacturing Engineering and Development6 EducationGlossary
