章节摘录

Today, roller skating is easy and fun, and it is popular throughout the world. People rollerskate outside on paths and roads, and inside in rinks. But a long time ago, it wasnt easy at all. Before 1750, the idea of skating didnt exist. That changed because of a man named Joseph Merlin. Merlins work was making musical instruments. In his spare time he liked to play the violin. Joseph Merlin was a man full of ideas and dreams. People called him adreamer. One day Merlin received an invitation to attend a fancy dress ball. He was very pleased and a little excited. As the day of the party came near, Merlin began to think how to make agr and entrance at the party. He had an idea. He thought he would get a lot of attention if he could skate into the room.
