<<202雅思技能强化训练>>

前言

雅思 (IELTS: International English Language Testing System) 考试是由澳大利亚教育国际开发署 (IDP Education Australia)、英国文化协会 (British Council) 以及剑桥大学考试委员会 (Cambridge ESOL) 共同举办的国际英语水平测试。

雅思考试主要为申请赴英语国家学习或工作的非英语国家学生而设, 用于评定考生运用英语的能力。此项考试目前在120个国家和地区举行, 并得到全球超过6000所院校、机构的认可, 每年报考人次超过140万。

雅思考试分为两大类: 学术类 (Academic) 和培训类 (General Training); 前者较多适用于留学, 后者较多适用于移民。

雅思考试包括四个部分, 依次为听力、阅读、写作和口语, 考试时间共计2小时45分钟。

考试中不涉及专业知识, 主要考查考生在真实的语言环境中用英语进行沟通的能力。

为了帮助广大考生更好地了解雅思考试的要求和特点, 迅速夯实语言基础, 提高应试技能, 我们推出了这套由澳大利亚Adams & Austen出版社出版的雅思辅导教材。

这套教材由澳大利亚雅思培训专家编写, 自出版以来受到全球考生的广泛赞誉, 是备战雅思考试的必选材料。

这套教材主要包含: 《101雅思制胜法则》: 分为学术类和培训类两册, 内含101条实用雅思备考技巧及大量的模拟练习; 《202雅思技能强化训练》: 包含针对雅思题型而设置的202道英语技能练习题及拓展练习, 学术类和培训类都适用; 《404雅思精编模考试题》: 分为学术类和培训类两册, 内含四套完整的雅思模考题及针对雅思考试各题型的备考建议; 《互动式三步搞定雅思1001词》: 帮助考生通过识记、转述、应用“三步走”轻松记忆雅思常考词。

本书是《101雅思制胜法则》的配套练习用书。

作者Garry Adams和Terry Peck均有丰富的雅思教学经验, 并参与了大量雅思培训项目的设计与实施; 其中, Terry Peck多年担任澳大利亚悉尼的雅思考官, 深谙雅思考试的出题规则和答题技巧。

书中的202道练习涵盖了雅思考试各类题型, 对考生的英语能力进行全方位的考查和练习。

APPENDICES Appendix 1 - Tapescripts Appendix 2- Answer Key Appendix 3 - Reference
INDEX Index

章节摘录

No one is certain why the jellyfish have made a home in the once clear blue waters near the popular resort, but what is certain is that something had to be done. The town relies almost exclusively on the resort and tourism for its survival; but Carrsville beach has been strewn with the deadly jellyfish now for the last two summers, and fishing and bathing are no longer possible. Last year, the Shire Council decided to enlist the help of Professor Stephen Blunt, a British marine biologist working with the biology department at the University of Northern Queensland, who proposed a controversial solution to the problem involving the foreshortening of the 2-kilometre-long rock shelf that lies 200 metres out to sea. The shelf apparently traps the creatures before they have the chance to escape back to the ocean and this, in turn, encourages them to increase in numbers. Global warming is thought to be at least partly responsible for slight changes in the recent patterns of moon tides which have, however, been enough to upset the delicate natural balance - allowing the jellyfish to reach the shore in numbers previously unheard of. By blasting away almost half of the rock shelf, Professor Blunt hopes the jellyfish will soon be a thing of the past. If the technique is successful, it may be used along other sensitive coastal waters of Northern Queensland. Environmentalist groups are observing the experiment with caution.
