章节摘录

Cars are lots of fun , dangerous. We have to be careful when we drivethem or ride in them. It ' s always a good idea to put on your seat belt when you ' re in a car.Why ? Think about this example : You put an egg on a skateboardand give it a push . If the skateboard hits a stone , it will stop , but the egg won ' t.It will flythrough the air , hit the ground and break. Now , think what would happen if you tied the egg tO the skateboard.When the skateboard hits a stone , the egg won ' t go flying.It will stay safelyOn the skateboard. Volvo , a famous Swedish carmaker , was the first to use seat belts in1949 . Air bags are also very , important for car safety because sometimes a seatbelt isn ' t enough.If the car is going really fast and runs into something , seatbelts could even hurt the people who wear them. Most newer cars have air bags in front of and next tO the seats. When acar hits something , its airbags will come Out quickly in less than one second ——to keep the people inside safe.
