## 章节摘录

插图：The Mid-Atlantic Colonies  
New Netherland was the one Atlantic coast colony founded by the Dutch. They famously purchased Manhattan from the Native Americans who lived there for a handful of cheap jewelry and founded the city of New Amsterdam there ( although this story is not historically accurate ) . This island at the confluence of the Hudson and East rivers was a perfect location for trading. This was the beginning of a long history of European immigration to what was to become New York City. It was not exclusively a Dutch colony but attracted settlers from many nations. In 1664 the English invaded New Amsterdam; its governor, Peter Stuyvesant, surrendered without a fight, and the colony was divided into two sections. One was renamed New York; the other, across the Hudson River, was called New Jersey. Pennsylvania, given by King Charles II to William Penn in 1681, was an experiment in religious toleration. Penn was a Quaker who intended that all the inhabitants of his colony, including Native Americans, should have equal rights. Thousands of immigrants sailed to Pennsylvania, attracted by the promise of freedom and by its abundance of fertile farmland. Philadelphia, Penn's planned "City of Brotherly Love," soon became the largest city in the colonies. The map below shows the original 13 British colonies, with the dates of their founding.
