## 前言

In 2003 , when we launched the third edition of this book with a new title : Advertising and Integrated Brand Promotion , some people questioned that title : "Isn't it supposed to be Advertising and Integrated Marketing Communication ?

" We were convinced back then and we are even more committed now to the proposition that advertisers and agencies alike are focused on the brand and integrated brand promotion ( IBP ) and that integrated marketing communication ( IMC ) was really a thing of the past and was probably the wrong term in the first place. We believe that our perspective has proved to be correct. Advertising and promotion is all about the brand , and practitioners are pursuing brand awareness and competitive advantage with an ever-expanding array of advertising and promotion brand-building techniques—all of which we are proud and excited to present to you here in Advertising and Integrated Brand Promotion , 5e. One point we want to make emphatically. Advertising and Integrated Brand Promotion , 5e remains the most current and forward thinking book on the market. Since the launch of the first edition in 1998 , we have alerted students to leading edge issues and challenges facing the advertising and promotion industries. We were the first to devote an entire chapter to the Internet as an advertising medium ( 1998 ) ; the first to alert students to the "dot-com" agency incursion on traditional advertising structure ( 2000 ) ; the first to raise the issue of consumers seeking and seizing control of their personal communications environment ( 2003 ) ; and the first to highlight blogs and DVP , s and the role they play in disseminating ( or blocking ) information about brands ( 2006 ) .

## 章节摘录

Building and Maintaining Brand Loyalty within the Trade. It might not seem as if wholesalers , retailers , distributors , and brokers would be brand loyal , but they will favor one brand over others given the proper support from a manufacturer. Advertising and particularly advertising integrated with other brand promotions is an area where support can be given. Marketers can provide the trade with sales training programs , collateral advertising materials , point-of-purchase advertising displays , premiums ( giveaways like key chains or caps ) , and traffic-building special events. Exide , the battery company , spends several million dollars a year to be the official battery of NASCAR racing. Mike Dever , Exides vice president of marketing and product management , explains : "Both our distributors and our distributors customers , for the most part , are race fans so its the place we want to be." Also , remember that trade buyers ( retailers , wholesalers , distributors , brokers ) can be key to the success of new brands or brand extensions , as we pointed out earlier in the discussion of the trade market as a target audience. Marketers have little hope of successfully introducing a brand if there is no cooperation in the trade channel among wholesalers and retailers. This is where IBP as a factor in advertising becomes prominent. This is because the trade is less responsive to advertising messages than they are to other forms of promotion. Direct support to the trade in terms of displays , contests , and personal selling combined with advertising in an IBP program helps ensure the success of a brand. Research also shows that retailer acceptance of a brand extension is key to the success of the new product.<sup>23</sup>

The Role of Advertising in Market Segmentation , Differentiation , and Positioning. The third role for advertising in marketing is helping the firm implement market segmentation , differentiation , and positioning. Market segmentation is the process of breaking down a large , widely varied ( heterogeneous ) market into submarkets , or segments , that are more similar ( homogeneous ) than dissimilar in terms of what the consumer is looking for. Underlying the strategy of market segmentation are the facts that consumers differ in their wants and that the wants of one person can differ under various circumstances. The market for automobiles can be divided into submarkets for different types of automobiles based on the needs and desires of various groups of buyers. Identifying those groups , or segments.
