

<<滨海城市水资源保护与管理>>

图书基本信息

书名：<<滨海城市水资源保护与管理>>

13位ISBN编号：9787811250787

10位ISBN编号：7811250780

出版时间：2007-09-01

出版时间：中国海大（原青岛海洋

作者：王琳

页数：296

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<滨海城市水资源保护与管理>>

内容概要

The marine environment is a precious asset. The oceans and seas provide 99% of the available living space on the planet; they cover 71% of the Earth's surface and contain 90% of the biosphere and consequently contain more biological diversity than terrestrial and freshwater ecosystems. Marine ecosystems play a key role in climate and weather patterns. Indispensable to life itself, the marine environment is also a great contributor to economic prosperity, social well-being and quality of life.

书籍目录

Part I Sustainable Exploitation and Utilization of Water Resource
 A Genetic Fuzzy Analytical Hierarchy Process Based Projection Pursuit Method for Selecting Schemes of Water Transportation Projects
 Integrity of Local Ecosystems and Storm Water Management in Residential Areas
 Irrigation Scheduling Measurements and Predictions in Shaanxi, North-West China
 New Developments in Water Efficiency
 Overall-effective Measures for Sustainable Water Resources Management in the Coastal Areas of Shandong Province, China
 Surface Water Function Zoning System and Its Application in China
 The Studies of Regional Water Circulation Patterns in the Yerqiang River Basin
 Urban Water Demand Management for Efficiency and Sustainability
 Reviewing Beijing Situation
 Vulnerability Mapping of a Coastal Aquifer in Qingdao, China, Using Mapinfo and the DRASTIC Approach
 Water Efficiency in Austin, Texas 1983-2005: A Historical Perspective
 Part 2 Wastewater Treatment
 A Study on the Attrition of Sewage Sludge and Sludge-based Char in the Fluidized Bed Reactor
 An Effective Alternative for the Retrofit of Existing Wastewater Treatment Plants: Pilot-scale Experiment and Mathematical Modelling
 Development of Combined Biological Technology for Treatment of High-strength Organic Wastewater and Results of Case Studies
 Biofloculant Produced by *Klebsiella* sp. MYC and Its Application in the Treatment of Oil-field Produced Water
 Design and operation performance of CAST process used in Hengyang Wastewater Treatment Plant In Shenzhen
 Evaluate the Location of Sewage Treatment Plants Based on Fuzzy DHP
 Lyric Characteristics and Identification of Two Alga-lysing Bacterial Strains
 Performance of a Subsurface-flow Constructed Wetland in Southern China
 Evaluation of Estrogenic Activity and Measurement of EDCs in Wastewater Treatment Plants
 Study on Algae Removal by Immobilized Biosystem on Sponge
 Suspended Particle Effects on Ultraviolet Light Disinfection of Effluent and the improvement Study
 The Study on the Coupling Bioreactor for the Domestic Wastewater Treatment of Low C/N Ratio
 Treatment of Municipal Landfill Leachate Using Two-stage Upflow Anaerobic Sludge Blanket Reactors and Anoxic-aerobic Reactor System
 Treatment of Oily Wastewater by Organic-inorganic Composite Tubular Ultrafiltration (UF) Membranes
 Wastewater Recycle Technologies in Eastern Mediterranean Coast: Aims, Problems and Solutions
 Part 3 Water Course and Nonpoint Pollution Control
 Environmental Characterization of Periphyton Community
 Calculation Method of Urban Surface Runoff Based on GIS
 Calculation of Intercepted Volume of Sewer Overflows: A Model for Control of Nonpoint Pollution Sources In Urban Areas
 A High Precision Comprehensive Evaluation Method for Flood Disaster Loss Based on Improved Genetic Programming
 Constructed Surface-subsurface Flow Wetland with a Reverse Flow Shifter for Urban Stream Water Quality Management
 Experiences with Constructed Wetland Systems in Korea
 Part 4 Sea Water Utilization
 A Pilot Study on Desalination of Produced Water with the Combined Process of Ultra filtration and.....
 Part 5 Drinking Water
