读进阶篇 UNIT 1 UNIT 2 UNIT 3 UNIT 4 UNIT 5 UNIT 6 UNIT 7 UNIT 8 UNIT 9 UNIT
10 下篇 阅读达标篇 UNIT 11 UNIT 12 UNIT 13 UNIT 14 UNIT 15 UNIT 16 UNIT 17 UNIT
18 UNIT 19 UNIT 20

章节摘录

In 1883, creative engineer named John Roebling was inspired by an idea to build a spectacular bridge connecting New York with the Long Island. However, bridge building experts throughout the world were very skeptical and unanimously thought that this was an impossible feat and told Roebling to forget the idea. It just could not be done. It was not practical. It had never been done before. There's no assurance it could be done now.

Roebling could not ignore the vision he had in his mind of this bridge. He thought about it all the time and he knew deep in his heart that it could be done. He just had to share the aspiration with someone else. After much discussion and persuasion he managed to convince his son Washington, an up-and-coming engineer, that the bridge in fact could be built. Working together for the first time, the father and son developed concepts of how it could be accomplished and how the obstacles could be overcome. With great excitement and inspiration, and the headiness of a wild challenge before them, they hired their crew and began to build their dream bridge.

The project started well, but when it was only a few months underway a tragic accident on the site took the life of John Roebling. Washington was injured and left with a certain amount of brain damage, which resulted in him not being able to walk or talk or even move.
