<<Small Houses in Finl>>

内容概要

This book presents a selection of the best single-family houses in Finland from the last 25 years. Each of the 29 houses presented shows a different approach to the design of a small house, from the site placement to the plan layout, facades, and use of materials, down to the handling of the construction details. All the houses are environmentally friendly and located in different environments, from countryside to city, from seashore to inland.
