<<正常经济理论/THEORY OF R>>

内容概要

This book presents a comprehensive treatment of the theory of regular economies, which is one of the most advanced topics in modern general equilibrium theory, emphasizing the basic ideas, the tools and the important applications. Although many notions and tools of differential topology are required to understand the theory, the author chooses a minimum of them and heuristically arranges them; that is, instead of lumping together all the necessary mathematics, the author puts at the beginning of each chapter the minimum mathematics required for the economic analysis of the chapter, so that the reader will not only save much effort on the mathematics but also directly understand how successfully the mathematics is used for the economic issues.

<<正常经济理论/THEORY OF R>>

书籍目录

Preface Introduction Part 1 Foundations of Regular Economies 1. What Is a Regular Economy? 1.1
 Mathematical Preliminaries 1.1.1 Manifolds and Tangent Spaces 1.1.2 Differentiable Maps and Their
 Derivatives 1.1.3 Regular Values 1.2 Economical Analysis 1.2.1 Basic Model 1.2.2 The Space of
 Economies 1.2.3 Regular Economies 2. Regular Economies and Genericity 2.1 Mathematical
 Preliminaries 2.1.1 Preimage Theorem 2.1.2 Lebesgue Measure Zero 2.1.3 Sard's Theorem 2.1.4
 Genericity 2.2 Economical Analysis 2.2.1 Regular Economies and Genericity 2.2.2 Local Uniqueness
 of Equilibria as a Generic Property 2.2.3 Finiteness of Equilibria as a Generic Property 3. Formalization of
 Regular Economies 3.1 Mathematical Preliminaries 3.1.1 Fibre Bundles 3.1.2 Vector Bundles
 3.1.3 Family of Maps 3.2 Economical Analysis 3.2.1 Equilibrium Manifold and Regular Economies
 3.2.2 Local Uniqueness and Finiteness of Equilibria in the General Formalization 3.2.3 Dependence of
 Equilibria on Regular Economies in the General Formalization 3.2.4 Specific Characterization of Regular
 Economies in the General Formalization 4. The Number of Equilibria in Regular Economies 4.1
 Mathematical Preliminaries 4.1.1 Modulo 2 Degree 4.1.2 Manifolds with Boundary 4.1.3 Homotopy
 4.2 Economical Analysis 4.2.1 Existence of Equilibria 4.2.2 The Number of Equilibria in Regular
 Economies 5. Stability of Equilibria in Regular Economies 5.1 Mathematical Preliminaries 5.1.1
 Oriented Manifolds 5.1.2 Degree of Smooth Maps 5.1.3 Vector Fields and Index 5.1.4
 Poincaré-Hopf Theorem 5.1.5 Stability Conditions for Dynamical Systems 5.2 Economical Analysis
 5.2.1 Walrasian Adjustment Mechanism 5.2.2 Stability of Equilibrium Prices in Regular Economies Part 2
 Transversality and Regular Economies 6. Space of Utility Functions 6.1 Mathematical Preliminaries
 6.1.1 Jet Spaces Part 2 Developments of Regular Economies Bibliography Index
